

CUMULATIVE INDEX 2001

Volume 28

January	NONOPERATIVE TECHNIQUES FOR FACIAL REJUVENATION, PART II, pages 1-252
April	HEAD AND NECK RECONSTRUCTION, pages 253-424
July	AUGMENTATION MAMMAPLASTY, pages 425-619
October	NEW DIRECTIONS IN PLASTIC SURGERY, PART I, pages 621-761

Note: Page numbers of article titles are in boldface type.

- Acne, active, dermabrasion in, 217
 - scarring due to, Alloderm acellular dermal grafts in, 97
 - dermabrasion in, 215-217
 - treatment of, in nonsurgical facial rejuvenation, 151
- Actinic cheilitis, 6
- Actinic keratoses, treatment of, 5-6
- Aesthetic claims, made against plastic surgeons, 613
- Aesthetician, training of, 181
- Aging, intrinsic, versus extrinsic photoaging, 236-237
- Air-bypass device prosthesis, 391
- Alloderm acellular dermal graft, 83-99
 - complications of, 98
 - for augmentation of nasolabial sulci, 92, 93
 - for lip augmentation, 87-92
 - graft preparation for, 88
 - postoperative care following, 90-92
 - surgical procedure for, 88-90
 - for scar revision, 96-97
 - for soft-tissue padding, 93, 94, 95
 - handling of, 85-86, 87
 - in oculoplasty procedures, 97-98
 - in rhinoplasty, 93-96
 - processing of, 84-85
 - uses of, 87
- Alloderm skin substitutes, 726
- Allotransplantation, composite tissue, clinical, 682
 - clinical studies in, 680-681
 - complications of, 681-682
 - future of, 682-683
 - immunologic issues in, 677-680
- Alpha-hydroxy acids, in photoaging, 240-241
 - in solar lentigines, 3, 4
- Alpha hydroxyacids, in skin care, 745
- Aluminum oxide crystals, exposure to, in microdermabrasion, 748
- Alveolar ridge, platysma flap for, 414, 416
- Anatomic breast implants, 441-442, 490-492, 528
 - adaptability of, to breast and chest wall deformities, 571-572
 - to wide range of designs, 572-573
 - adequate fill of, upper pole fill without shell wrinkling, maintenance of, 570-571
 - with manufacturer's warranty, 572
 - with optimal aesthetics, 570
- advantages of, 569-573
- clinical examples of, 554-558
- clinical experience with, 568-569
- cohesive gel, 531-552
 - advantages of, 549-550
 - breast and chest dimensions and deformities and, 535-536
 - characteristics of, 532-533
 - disadvantages of, 550-551
 - glandular parenchyma and, 535
 - in secondary breast augmentations, 544-545, 546, 547
 - models of, 533-534, 535
 - patient desires and, 534-536
 - patient satisfaction with, 548
 - pectoralis muscle and, 535
 - placement of, 540-542
 - preoperative assessment and measurements for, 534
 - preoperative markings for, 542-543
 - results of, 545-547
 - selection of, 536-540
 - surgical technique for, 543-544, 545
 - types of, 532
- disadvantages of, 573
- experience with, 553-559
- full height saline, 567-577
 - textured, 568
- immobility and, 576
- implant malposition and, 573-574
- patient choice of, 569-570
- "pseudo-advantages" of, 573-576
- reduced-height, development of, 562
 - for breast reconstruction, 562
 - for primary breast augmentation, 562
 - for unilateral augmentation, 562-563
 - new, goals of, 568
 - placement of, 563-564
 - position asymmetry and, 564-565
 - pros and cons of, 561-565
 - saline filled, 563
 - to create natural-appearing breast, 562, 563
 - Replicon polyurethane-covered, silicone gel-filled, 567-568

- Anatomic breast implants (*Continued*)
 seroma and, 575-576
 shell palpability and firmness of, 574-575
 visible rippling or wrinkling and, 575
 Anesthesia, for dermabrasion, 223-224
 for pediatric plastic surgery, 731-732
 Antioxidants, 745
 in solar lentigines, 3
 Arm, upper, skin on, anatomy of, 367-368
 Arm flap, lateral, 367-374
 cases illustrating, 368-370, 371
 discussion of, 370-372
 surgical approach to, 368
 Ascorbic acid, in skin rejuvenation, 746
 Aspiration, in conservational laryngectomy, 400
 Augmentation mammoplasty, 425-615
 Autogenous tissue, restoration of voice with, tracheal reconstruction for, 398
 Autografts, epithelial, cultured, for children, 732, 733
 Autologen, as injectable human tissue collagen matrix, 79-80
- Bell's palsy, botulinum A toxin injection in, 135, 136
 Blepharoplasty, composite, 623, 624, 631
 laser, 623
 traditional, 623
 Blom-Singer prosthesis, tracheoesophageal puncture with, 393
 Blood supply, arterial, of submental flap, 303-304
 Bone, vascularized, for mandibular reconstruction, advantages of, 273-275
 indications for, 275, 276
 Bone contouring, and fixation, for osseointegration teeth, 404-405
 Bone engineering, biocompatible polymeric scaffolds and, 723-724
 distraction osteogenesis and, 724-725
 research in, 723-725
 Botox. See *Botulinum A exotoxin*.
 Botulinum A exotoxin, adverse reactions to, 167-169
 as prelude to facial aesthetic surgery, 128-130
 drug interactions with, indications and contraindications to, 128
 extended uses of, in facial surgery, 135-146
 in rhytides, 11
 method of injection of, 131-135
 preparation and dilution of, 131
 primary and adjunctive use of, complications of, 146, 147
 history of, 127-128
 in facial aesthetic surgery, 127-148
 resistance to, 131
 Botulinum toxin, in rhytides, 53
 Breast, female, 607-608
 photography of, liability pitfalls in, 612
 reconstruction of, microvascular free flaps for, 676
 tuberous deformities of, breast implants in, 476
 Breast augmentation, adjustable, 590-591
 alternatives to, and tradeoffs in, 485-500
 in United States, 490
 outside of United States, 493-494
 priority of, 486
 anatomic parameters influencing, 474-476
 behavior of surgeon during and after, 612-613
 bleeding and, 516
 clinical evaluation record for, 505, 506
 clinical evaluation sheet for, 429
 complications of, 587-596
 correction of, 589-591
 delayed, 587-588
 early, 587
 dissection techniques for, 518
 effective disclosure for, 609-612
 failure of, 614-615
 forms for, 610-611
 filler materials for, 435-443
 alternative, 436-437
 approval process for, 435-436
 history of, 435
 future perspectives in, 434
 implant selection for, 514-515
 implant sizes in, 518-519
 implants for. See *Breast implant(s)* and specific types of implants.
 incision approach(es) for, 496-498
 axillary, 497-498
 inframammary, 496-497
 periareolar, 497
 periumbilical, 497-498
 informed consent for, 609
 informing patient before consent for, 608-609
 instrumentation for, 516-518
 limitation of reoperations for, 433-434
 morbidity in, and reoperations in, as problem, 501-502
 control and reduction of, 501-523
 and complications of, tissue and implant fill parameters affecting, 502
 muscle, fascia, and parenchyma modifications for, 513-514
 operative planning for, 426-427
 or mastopexy, 515
 patient counseling for, 505-507
 patient education for, 425-426
 patient evaluation for, 427
 and education for, 502-509
 patient recovery from, 433
 patient selection for, from risk perspective, 615
 perioperative control of, 498
 perioperative technique of, 591-594
 photographic documents for, 609-613
 photographs, "brag books", or computer imaging for, 612
 pocket location for implant for, 432
 postoperative management following, 527-529
 postoperative medications in, 520
 postoperative techniques following, 594
 preoperative evaluation for, 588-589
 prevention of litigation in, 607-615
 retraction techniques for, 518
 sources of dissatisfaction with, 613-614
 surgical planning for, 427-433, 509-515
 surgical techniques for, 433, 515-520
 tissue considerations for, 427-428, 502-503
 tissue evaluation for, 503-505, 509-510
 tissue trauma in, 516
 minimizing of, 498-500
 traction rippling in, 509
 transumbilical, 597-605
 capsular contracture in, 600-602
 clinical experience with, 600-603
 deflation of, 600
 hematoma of, 602
 inadvertent submuscular placement of, 602
 patient consultation for, 597-598
 subglandular placement of, 598
 submuscular placement in, 599-600
 surgical procedure for, 598-600

- two decades of, surgical perspective from, 425-434
 with anatomical cohesive gel implants, 531-552
 with full height anatomic saline implants, 567-577
 with reduced-height anatomic implants, 561-565
 with round, smooth saline or gel implants, 523-529
- Breast deformity, tubular, correction of, 591
- Breast implant surgery, biostable shells in, 701
 frequency of additional surgeries in, 699
 future directions in, 687-702
 gels for, 701
 need for, 689
 new concepts in, 701
 noninvasive MRI studies in, 693-699
 recent developments in, 700-701
 saline implants for, 699-700
 silicone gel implants for. See *Silicone gel breast implants*.
 soybean oil and aqueous PVP fluid fillers in, 700-701
 testing of new implants for, 701
 to improve self-image, 687, 688
 with saline prefilled implants, 692-693
- Breast implant(s), aesthetic outcome of, factors influencing, 468
 anatomic. See *Anatomic breast implants*.
 available on international market and not in United States, 438-440
 base diameter, 476
 capsular calcification surrounding, 465
 capsular contracture and, 470
 closed capsulotomy and, 464
 damage during surgery, 462-464
 studies of, 477-478
 design of, improving of, 478-480
 obstacles in, recognition of, 480-481
 double bubble, correction of, 590
 drains and, 520
 elastomer shell abrasion, 459
 failure of, 455-458
 risk factors for, 462-465
 fill volume, deflation and, 460-461
 optimal, 445-447, 461, 492-493, 510-511, 527
 and overfill, 448-449
 filler material, ideal, 479-480
 filling of, 519
 for breast reconstruction, 469
 history of, 451-454
 ideal, characteristics of, 445
 in hypomastia, 554, 555
 in postpartum loss of volume, 554, 555
 in tight skin envelope, 554, 556, 557, 558
 in tuberous breast deformities, 476
 incision approach for, selection of, 428-430, 432-433
 incisions for, 468, 526-527
 larger, patient requests for, 507-509
 local complications of, 465-468
 malposition of, correction of, 590
 malrotation of, 449
 mammography and, 464
 material degradation, 461-462
 measurements and breast asymmetry for, 476
 new designs for, 435-443
 current studies in, 437-438
 objectives of, volume fill and, 445
 options for, in United States, 431
 overfill of, 447
 palpability and, 472-474
 patch detachment, 459-460
 patient variables influencing, 474-476
 placement of, 525-526
 pocket adjustments for, 519-520
 pocket dimensions and inframammary fold position for, 512-513, 518
 pocket location for, 486-490, 511-512
 positioning of, 468-469
 postoperative devices and, 520
 preoperative assessment for, 525
 preoperative planning and surgical considerations for, 468
 reoperations following, defining endpoints for, 507
 frequency of, 465-468
 reduction of need for, 478
 replacement of, considerations for, 469-470
 research on, 451-483
 rippling of, correction of, 590
 rupture/deflation of, mechanical causes of, 458-461
 safety and efficacy issues associated with, 440-441
 selection of, 430-431
 shape and profile of, 471-472
 breast characteristics and, 492
 shape of, alternatives in, 490-491
 ideal, 478
 shell of, ideal, 478-479
 size of, and implant-soft tissue dynamics, 494-495
 selection of, 494, 514-515, 527
 skin wrinkling and, 472-474
 surface characteristics of, 431-432
 surgical considerations for, 525-527
 tissue limitations and, 495-496, 502-503
 traction wrinkling and, 449
 trauma to, 464-465
 type and size of, selection priorities for, 490
 valve failure, 460
 variables in, affecting aesthetic outcome, 470-471
 warranty issues and, 448
- Buccal mucosa, microsurgical reconstruction of, 339-347
 after cancer resection, 340-343
 conditions requiring, 339
 recipient vessels for, 340
 recurrent or adjacent second primary cancer of, reconstruction in, 343
- Burns, pediatric burn care in, 732
- Cancer, of head and neck, multidisciplinary care in, 253-260
 prefabricated and prelaminated flaps for reconstruction in, 261-272
- Canthal suspension procedures, botulinum A toxin injection in, 138, 139
- Canthalpathy, lateral, 300-301
- Canthopexy, pretarsal orbicularis, 641
- Capsular contracture, breast implant and, 470-471
 in breast augmentation, 587-588, 590, 600-602
- Capsulotomy, closed, breast implants and, 464
- Carbon dioxide laser. See *CO₂ laser*.
- Cartilage, research on, 725
 scaffold-based constructs and, 725
- Cartilage grafts, for nasal reconstruction, 313-314
- Cerebrospinal fluid leak, as complication of cranial base resections, 385-386
- Cervicofacial flap, for cheek reconstruction, history of design of, 283, 284
- Cheek, and nose, total reconstruction of, flap
 prelamination of free flap of forearm in, 268-271
 platysma flap for, 414-417
 reconstruction of, background and history of, 283-285
 cervicofacial flap design for, history of, 283, 284
 clear pathologic margins for, 287-288, 291
 dissection for, level and extent of, 287, 288-291

- Cheek (*Continued*)
 facial anatomy and flap blood supply for, 285-286
 flap for, internal structure of, 288-289
 indications for, 286-287, 288, 289, 290
 perioperative considerations and postoperative sequelae of, 291-295
 placement of incisions for, 288, 289, 292, 293
 prevention of ectropion in, 299-301
 staging of, 287-288
 technique of, 287-291
 with laterally based flaps, 283-296
 through-and-through defects of, reconstruction of mouth after cancer resection, 341-343, 344
- Cheeklift, subperiosteal, 626
- Chemical peeling, complications of, 231-234
 procedural, side effects of, 231-232
- Chemical peels, complications related to, 169-172
 for nonsurgical facial rejuvenation, 158
 in photoaging, 243
 postoperative skin care following, 204
- Chemotherapy, dermabrasion following, 220
 dermabrasion in, 220
- Cleft lip, and cleft palate, research on, 719-721
 in vitro models in, 721
 lagomorph models for, 720
 murine models for, 720
 ovine and caprine models for, 720-721
 treatment of, advances in, 732, 734
 anomalies associated with, 662
 etiopathogenesis of, 661-662
 genetic influence on, 661-662
 in utero repair of, 662-663
 management of, new directions in, 661-669
 prenatal diagnosis of, 662
 smoking during pregnancy and, 661
 teratogens implicated in, 662
 unilateral, repair of, 663-664
- Cleft lip/nasal deformity, bilateral, alveolar molding
 plate for repair of, 666-667
 forked flap technique in, 665
 protocol for repair of, 668
 simultaneous repair of, 668
 skin expansion for, 665
 staging of nasal correction in, 666, 668
 synchronous repair of, 666, 667
 by columella lengthening and lip repair in, 666
- physiologic repair of, 664
 unilateral, repair of, early initiation of, 663
 primary, 664
 protocol for, 665
 timing of, 664-665
- Cleft palate, cleft lip and. *See* Cleft lip, and cleft palate.
- CO₂ laser, for cutaneous resurfacing, 38-44
 clinical and histologic benefits of, 39-40
 contraindications to, 44
 patient education for, 44
 side effects of, 40-44
 for nonsurgical facial rejuvenation, 158-159
- Cohesive gel implants. *See* Anatomic breast implants, cohesive gel.
- Collagen, bovine. *See* also Zyderm collagen implants; Zyplast collagen implants.
 background and development of, 53-55
 ectopic implantation of, 166-167
 for lip augmentation, 60-61
 granulomatous reactions to, 164-165
 herpes simplex and, 166
 hypersensitivity reactions to, 163-164
 sterile abscesses caused by, 165
 therapy using, adverse responses to, 57
 implantation techniques for, 58-59
 indications for, 56
 maintenance of correction following, 59-60
 skin testing for, 57
 tissue necrosis due to, 165
 in rhytides, 10
- Collagen matrix, injectable human tissue, current
 therapy using, 68-69
 Dermalogen as, 69-80
 Dermaplast as, 69-80
 facial augmentation with, 63-81
 historical perspective and evolution of, 66-68
- Collagen replacement therapy, for facial augmentation, 64-65, 66
- Collagen substitutes, 53-62
- Congenital deformities, plastic surgery in, 731
- Congenital nevi, management of, 740-743
- Cosmeceuticals, 745
- Cosmetologist, training of, 181
- Costochondral autograft, 725
- Cranial fossa, anterior, anatomy of, 376
 middle, anatomy of, 376
 posterior, anatomy of, 376
- Cranial vault, middle, reconstruction of, resorbable
 fixation for, 656, 658
- Craniofacial anomalies, advances in management of, 732-735, 736, 737
- Craniofacial research, 719
- Craniofacial surgery, use of bioresorbable material in, 653-659
- Craniomaxillofacial skeleton, fixation in, history of, 653-659
 surgery of, metallic plating systems in, 653
 wire fixation in, 653
- Craniosynostosis research, 721-723
 in vitro models in, 722-723
 lagomorph models for, 722
 murine models for, 722
 ovine models for, 722
- Deep circumflex iliac artery flap, aesthetically
 successful, for single plate mandibular
 reconstruction, 273-282
- Deflation, as delayed complication of breast
 augmentation, 588
- Dental aesthetics, and nonsurgical facial rejuvenation, 155
- Dental implants, placement of, for osseointegration
 teeth, 405
- Dental oncology, in cancer of head and neck, 258-259
- Dental prosthesis, implantation of osseointegration teeth
 and, 405-406
- Dermabrasion, 204-205, 215-234
 adjunctive procedures with, 227-229
 anesthesia for, 223-224
 benefits of, 215-217
 chemotherapy or laser versus, 229
 contraindications to, 217-221
 in photoaging, 243
 indications for, 215, 216, 217, 218
 instrumentation for, 222
 office and staffing considerations for, 222-223
 patient education and informed consent for, 221
 physician qualifications and technical skills for, 221
 postoperative care following, 225
 postoperative sequelae or complications following, 226-227
 preoperative considerations for, 221-222

- psychiatric evaluation for, 221
 repeat, 229-230
 special considerations for, 219-221
 surgical methods for, 224-225
 wound care following, 205
- Dermalogen, 69-80
 appearance of, 69
 complications of, 79-80
 technique for use of, 70-76
- Dermaplant, appearance of, 69, 70
 complications of, 79-80
 histologic evaluation of, 69, 71
 technique for use of, 76-79
- Distraction osteogenesis, bone engineering and, 724-725
- Ectropion, Alloderm acellular dermal grafts in, 97-98
 as complication of laser resurfacing, 174
 following biopsy of cheek carcinoma, in reconstruction of facial defects, 297, 299
 prevention of, in cheek and lower eyelid reconstruction, 299-301
 in reconstruction of facial defects, 297-302
- Electrodesiccation, following dermabrasion, 229
- Electrosurgery, for ablative cutaneous resurfacing, 47-49
- Encephalocele, repair of, resorbable fixation for, 656, 658
- Epithelial autografts, cultured, for children, 732, 733
- Erbium:yttrium-aluminum garnet laser. See *Er:YAG laser*.
- Er:YAG laser, and CO₂ laser, compared, 44, 45, 46
 long-pulsed, for cutaneous resurfacing, 46
 short-pulsed, for cutaneous resurfacing, 44-46
 advantages of, 45-46
 assessment of wound depth in, 45
 conditions amenable for, 45
- Esophageal voice, 391
- Esophagus, cervical. See also *Hypopharynx, and cervical esophagus*.
 and voice, reconstruction of, pitfalls in, 399-400
 jejunum transfer for, stricture following, 399-400
 reconstruction of, microvascular free flaps for, 675-676
- Extremities, reconstruction in, microvascular free flaps for, 677, 678, 679, 680, 681
- Eye(s), habituation of, botulinum A toxin injection in, 135, 137
 improvement of contours or position of, botulinum A toxin injection in, 138, 142, 143
- Eye(s), lower, and midface rejuvenation, complications of, 639
 evolution of support of lower lid following, 639-652
 inferiorly based cervical facial flap for, 300-301
 reconstruction of, prevention of ectropion in, 299-301
 retraction of, following rhytidectomy and blepharoplasty, 634, 637
 support of, following lower lid/midface rejuvenation, complications of, 649-652
 evolution of, 639-652
 experience with, 641-649, 650-651
 reconstruction of, basic principles of, 299
 surgical zones of, 297-299
 transblepharoplasty of, and midface rejuvenation, 639
- Eye(s), aging, normal, 631
 hollow, following facelift, 631, 634, 635, 636
- Face, aging, 626, 629
 anatomy of, and flap blood supply for cheek reconstruction, 285-286
 and skin, aging, common signs and treatment of, 1-12
 augmentation of, alloplastic agents for, 65-66
 collagen replacement therapy for, 64-65, 66
 with allogenic human tissue collagen matrix, 63-81
 contour of, microvascular free flaps for aesthetic reconstruction of, 361-366
 discussion of, 361-366
 surgical technique for, 361-362
- contouring of, using external ultrasound, cases illustrating, 705-712, 713-716
 drawbacks to, 703
 evaluation of patients following, 704-705
 external liposuction-assist fat for, 703-704
 new perspectives in, 703-718
 patient complaints concerning, 703
- defects of, reconstruction of, in ectropion following biopsy of cheek carcinoma, 297, 299
 prevention of ectropion in, 297-302
- deformities of, following conventional facelift techniques, 626-631
- lateral arm flap for reconstruction of. See *Arm flap, lateral*.
- muscular anatomy of, 130
- paralysis of, congenital, advances in management of, 735-738
- reanimation of, microvascular free flaps in, 677

 facial, laser resurfacing of, overview of, 37-52
 health of, nutrition and, 201
 intrinsic aging of, 7-11
 laser resurfacing of, adverse reactions to, 172-174
 major components of, 83
 photoaged, 2
 upper arm, anatomy of, 367-368
- Skin care, and ancillary personnel, in facial rejuvenation, 177-211
 history and background of, 177-178
 home, cleansers for, 189
 exfoliants in, 189-191
 moisturizers and hydration for, 191
 sun protection in, 191-192
 toners for, 189
 new directions in, 745-750
 treatment options to optimize outcomes of, 178-179
- Skin care specialist(s), plastic surgical, 178-181
 administration of skin care services by, 181-182
 and titles to describe employees of, 181
 certification for employees of, 181
 continuing education for, 209
 documentation by, 208
 enhancement of aesthetic surgical outcomes by, 182
 equipment of, 208-209
 evaluation of skin care lines by, 183-185
 informed consent and, 207
 investment in inventory by, 184-185
 knowledge of cosmetic industry, 183
 malpractice coverage for, 206-207
 patient management by, 182-183
 perpetuation of longevity of results of, 183
 personnel decisions for, 180-181
 practical roles of, 181-183
 prescription medications and, 207-208
 pretreatment goals of, 185-201
 relationship building by, 197-198
 risk management for, 206-209
 standards of care and, 208
 supervision of nurses by, 208
 team building by, 184
- Skin disorders, diagnosis of, for nonsurgical facial rejuvenation, 151
- Skin expansion, for bilateral cleft lip/nasal deformity, 665
- Skin grafts, for nasal lining, 311-324
- Skin resurfacing, in photoaging, 241-243
- Skin substitutes, advancements in development of, 726
 alloderm, 726
 graftskin, 726
- Skull base, defects of, coverage of, 375-387
 history of, 375
 reconstruction of, complications and outcomes of, 385-386
 external prosthesis with, 378, 379
 scalp as donor site for, 378-381
 reconstructive goals in, 377-378, 379
 region I, reconstruction of, 381-383, 384
 region II, reconstruction of, 383-385
 region III, reconstruction of, 385
 surgical anatomy of, 376-377
 tumors of, classification according to region, 376, 377
- Smoking, during pregnancy, cleft lip and, 661
- Soft tissue, augmentation of, 101-110
 conceptual issues in, 105-109
 hyaluronic acid for. See *Hyaluronic acid*.
 preserved particulate fascia for. See *Fascia, preserved particulate*.
 lack of, for breast augmentation, correction of, 589
- Solar lentigines, hyperpigmentation in, 2-4
- Soybean oil, fillers, in breast implant surgery, 700
- Speech, following laryngopharyngectomy, 389
 evaluation of, 389-390
- Speech rehabilitation, following reconstruction of hypopharynx and cervical esophagus, 350
- Stainless steel, for plates and screws, disadvantages of, 654
- Stricture formation, following jejunum transfer for esophagus, 399-400
 following reconstruction of hypopharynx and cervical esophagus, 358
- Subgaleal fossa, 380
- Submental flap, advantages of, 307, 308
 arterial blood supply for, 303-304
 as pedicled or free flap, for facial reconstruction, 303-309
 disadvantages of, 307-308
 drawing of, 304-305
 harvesting technique for, 305
 results of use of, 305-306
 case report of, 306-307
 surgical technique for use of, 304-305
 venous drainage of, 304
- Submucous fibrosis, oral, 339
 reconstruction of, 345
- Suborbital region, Alloderm acellular dermal grafts in, 98
- Sun exposure, skin changes caused by, 1-7
- Sunscreens, to prevent photoaging, 237-238
- Superficial temporal fascia, 381
- Surgical oncology, in cancer of head and neck, 257
- Swallowing, following laryngopharyngectomy, 389
- Synmastia, following breast augmentation, correction of, 589
- Syringoma, 9
- Tattooing, in nonsurgical facial rejuvenation, 158
- Tattoos, removal of, by dermabrasion, 219
- Telangiectasias, treatment of, 6-7
- Temporalis muscle for repair of skull base, 381
- Temporoparietal fascia, 381
- Thrombosis, vascular, following reconstruction of hypopharynx and cervical esophagus, 355-358
- Tissue engineering, in pediatric patients, 743
 research in, 723
- Tissue expansion, for reconstruction of large defects of scalp, 742
- Titanium, for plates and screws, advantages of, 654
- Tooth (Teeth), osseointegration, bone contouring and fixation for, 404-405
 implantation of, 405
 and dental prosthesis, 405-406
 placement of dental implants for, 405
 primary, in vascularized fibula osteoseptocutaneous flap, cases illustrating, 406-409
 discussion of, 406-409
 surgical procedure for, 404-406
 timing and patient selection for, 404
- Trachea, congenital stenosis of, allograft laryngotracheal transplantation in, 398-399

- reconstruction of, for restoration of voice with autogenous tissue, 398
- Tracheoesophageal puncture, forearm flap for esophageal reconstruction followed by, 394
 - gastric pull-up followed by, 394
 - jejunum flap for esophageal reconstruction followed by, 394
 - Panje button and, 394
 - with Blom-Singer prosthesis, 393
 - with Nijdam voice prosthesis, 393
 - with Provax prosthesis, 393
 - with voice prosthesis, 392-395
- Transblepharoplasty, of eyelids, and midface rejuvenation, 639
- Trauma injuries, in children, plastic surgery in, 731
- Tretinoin, 745-746
 - in photoaging, 238-239
 - topical, in solar lentigines, 2-3
- Trichloroacetic acid, in solar lentigines, 4
- Trilucent breast implant, 436-437
- Trunk/torso area, reconstruction of, microvascular free flaps for, 676-677
- Ultrasound, external, for facial contouring. *See* Face, contouring of, using external ultrasound.
 - for nonsurgical facial rejuvenation, 160-161
- Vascular abnormalities, due to sun exposure, 6-7
- Vascular thrombosis, following reconstruction of hypopharynx and cervical esophagus, 355-358
- Vegetable triglycerides, for breast implants, 436
- Venous lakes, treatment of, 7
- Vitallium, for plates and screws, advantages of, 654
- Vitamin C, in photoaging, 239
 - in skin rejuvenation, 746
- Vitamin E, in photoaging, 239-240
- Vitiligo, dermabrasion in, 219
- Voice, cervical esophagus and, reconstruction of, pitfalls in, 399-400
 - esophageal, 391
 - hand-held internal device to produce, 391
 - implanted intraoral device to produce, 391
 - reconstruction of, after laryngectomy, 389-402
 - classifications of, 390
 - methods of, 390
 - voice tube shunt for, 395-398
 - and rehabilitation of, criteria for future development of, 400-401
 - rehabilitation of, leakage interfering with, 399
 - restoration of, with autogenous tissue, tracheal reconstruction for, 398
- Voice device, external, 391, 392
- Voice prosthesis, after total laryngopharyngectomy, 394-395
- Voice tube shunt, for voice reconstruction after laryngectomy, 395-398
- Whitnall's tubercle, 299
- Wire fixation, in craniomaxillofacial skeleton, 653
- Wrinkles, facial, anatomy and physiology of, 130-131
- Xerosis, management of, 7-8
- Zyderm collagen implants, 55, 56
 - adverse reactions to, 163, 164
 - composition of, 55-56
- Zyplast collagen implants, 55, 56
 - composition of, 56
